

## Media Release

Ad-hoc- announcement pursuant to Art. 53 LR

Altstätten, 16 January 2026

### **COLTENE publishes preliminary key figures for financial year 2025**

**COLTENE Holding AG, a leading international developer and manufacturer of dental consumables and small equipment, achieved consolidated sales of CHF 240.2 million in fiscal year 2025 according to preliminary figures (2024: CHF 250.2 million). In local currencies, this is roughly on par with the previous year (-0.2%). In the reporting currency, sales declined by -4.0% due to unfavourable exchange rate effects, particularly the appreciation of the Swiss franc. The EBIT margin for the past financial year was 8.8%.**

In the second half of 2025, the expected sales recovery materialised with growth of 4.7% in local currencies, after the first half had been impacted by geopolitical factors and temporary order delays related to the optimization of dealer management. The general market restraint persisted. In the North America region, this resulted in a slight decline in sales in local currencies, while the EMEA (Europe, Middle East, and Asia) region recorded an increase.

COLTENE anticipates an EBIT margin of 8.8% for the 2025 financial year (2024: 10.7%). Despite further reductions in operating costs, the continued strength of the Swiss franc and advance payments related to US tariffs exerted pressure on the gross margin.

COLTENE remains committed to its previously announced medium-term targets. The company will release detailed information on the business performance in 2025 and its outlook for 2026 with the publication of its 2025 annual report on March 6, 2026.
