

## Cosmo welcomes the Launch of Winlevi® in Key European Markets by its Partner Glenmark

**Dublin, Ireland – June 11, 2026:** Cosmo N.V. (SIX: COPN) (“Cosmo”) is pleased to make known that its commercial partner Glenmark Specialty S.A (GSSA), a wholly-owned subsidiary of Glenmark Pharmaceuticals Ltd., today announced the launch of Winlevi® (clascoterone 10 mg/g cream) across key markets in Europe. This follows the grant of marketing authorization of the product for the treatment of acne vulgaris in both adults and adolescents aged 12 to <18 years (with usage in adolescents limited to facial application) by the European Commission to Cassiopea S.p.A., a subsidiary of Cosmo N.V., in October 2025.

Glenmark has initiated direct launches of Winlevi® in several European markets, including the Nordics, Central and Eastern Europe, and Spain. In Portugal, the Company has launched the product through a strategic partner. Glenmark is also advancing additional launches through strategic partnerships across other European markets.

Winlevi® is authorized in the European Union for the treatment of acne vulgaris in adults and adolescents. The product has been developed by Cassiopea, which holds rights across Europe and collaborates with regional partners for commercialization. Cosmo will be the exclusive manufacturer for the product.

Acne vulgaris is one of the most common dermatological conditions globally. More than 95% of males and 85% of females will experience acne during adolescence. Fifty percent will continue to experience it in adulthood. Acne can have a significant physical and psychological impact, particularly among adolescents and young adults.

Winlevi® is the first topical acne therapy in more than 40 years with a first-in-class mechanism of action. Its active ingredient, clascoterone, is the first commercially available topical androgen-receptor inhibitor acting locally in the sebaceous glands to reduce sebum production and inflammation without systemic anti-androgen effects, supporting safe use in both males and females. The availability of the product now represents an additional treatment option for healthcare professionals and patients in Europe.

**Giovanni Di Napoli, Chief Executive Officer of Cosmo, said:** *“The European launch of Winlevi® represents an important milestone for Cosmo and reflects the strength of our collaboration with Glenmark. This achievement supports our strategy of expanding the global reach of our innovative dermatology portfolio through trusted partnerships and disciplined execution. We are pleased to see Winlevi® becoming available to patients across Europe and look forward to continuing to build on the momentum of our long-term partnership with Glenmark.”*

**Jiri Havranek, Group Vice President & Business Head – Europe, Glenmark Pharmaceuticals, commented:** *“This launch is an important step in strengthening Glenmark’s dermatology portfolio and advancing our branded business in the region. As Glenmark’s first NCE launch in Europe, it reflects our*

*focus on bringing differentiated treatment options to patients through disciplined execution, strong market access alignment and meaningful partnerships. We remain committed to expanding access to therapies that address unmet needs and support better outcomes for patients.”*

**About Cosmo**

Cosmo is a life sciences company focused on MedTech AI, dermatology, gastrointestinal diseases, and contract development and manufacturing (CDMO). We design, develop, and manufacture advanced solutions that address critical medical needs and raise the standard of care.
